1.2 Product Information
Product Name: QuickVue Influenza A+B Test (Catalog #: 20169, 20183, 20185, 20189 and 20191)
Recommended Use: The QuickVue Influenza A+B test allows for the rapid, qualitative detection of influenza type A and type B antigens directly from nasal swab, nasopharyngeal swab, nasal aspirate, and nasal wash specimens. The test is intended for use as an aid in the rapid differential diagnosis of acute influenza type A and type B viral infections. This test is intended for professional and laboratory use only.
Components: Kit is composed of individually pouched test cassettes, extraction tubes, extraction reagent solution, disposable droppers, sterile nasal swabs, Influenza Type A positive control swab (swab is coated with non-infectious recombinant influenza A antigen), Influenza Type B positive control swab (swab is coated with non-infectious recombinant influenza B antigen) and negative control swab (swab is coated with formalin-inactivated, non-infectious Streptococcus C antigen).

2.1 Emergency Overview
Significant health effects are not anticipated from routine use of this material when following the precautions listed within the kit specific Package Insert, Universal Precautions and general safety laboratory practices. None of the components listed within this kit are considered hazardous as defined by the Occupational Safety and Health Administration (OSHA), the Canadian Workplace Materials Information System (WHMIS), or the European Union (EU) Directives.

When working with this kit we always recommend that employees wear appropriate personal protective equipment (PPE), including gloves, a lab coat and eye protection, and follow good laboratory hygiene practices to avoid any and all accidental exposure to workplace materials. Universal Precautions should be followed when working with any potentially infectious material.
